

Joffiels - Go-Live Checklist

2026-06-07

Already built & confirmed

- Storefront + 20 launch listings (SEO titles + 13 tags + descriptions).
- Full order->delivery automation (intake, AI quote, QC, proof, fulfillment, tracking, delight).
- Ask Ange AI assistant (free on-page; optional live Claude endpoint).
- Email capture: Etsy announcement, QR insert, Linktree, website signup.
- Pinterest: pin packs + pins.csv (5-10 pins/product, gift-guide & seasonal).
- Analytics ready: Etsy Shop Stats (enable in Etsy), Google Analytics + Microsoft Clarity (set IDs).
- Reporting: daily ledger, Friday review, monthly executive packet (all costs), AI ops review - archived in the cost folder + emailed.
- Safety: 60% margin floor, QC-before-proof, human-approved refunds, backups.

Launch steps (in order)

1. Approve the physical sample (THE gate)

Place one real Gelato order from your design, confirm print + color quality in hand. Nothing else goes live until this passes.

2. Add real keys to .env

ANTHROPIC_API_KEY, GELATO_API_KEY, ETSY_API_KEY + ETSY_OAUTH_TOKEN/REFRESH_TOKEN, GMAIL_ADDRESS + app password. (See .env.example.)

3. Verify

```
python -m quoteforge.admin verify-keys then python -m quoteforge.admin preflight
```

4. Go live

Set TEST_MODE=false in .env (only after the sample is approved).

5. Publish the Etsy listings

`python -m quoteforge.admin publish-listings --live` (creates drafts + uploads images) -> review and hit Publish on each in Etsy. Apply the variation matrix from `etsy_inventory.csv` (Material x Size x Frame).

6. Confirm Etsy shop settings

Production partner = Gelato; shipping profile set; return/cancel policy; payments + currency (USD); shop icon/banner; About + announcement.

7. Turn on automation

`python -m quoteforge.admin install-schedule` (run as Administrator) - registers all 26 scheduled jobs. (Or host per docs/DEPLOY.md.)

8. Marketing switches (optional, free)

Set SIGNUP_URL (mailing list), GA_MEASUREMENT_ID + CLARITY_PROJECT_ID, FEEDBACK_FORM_URL. Run: email-capture, pinterest. Apply to affiliate programs: python -m quoteforge.admin affiliates.

9. (Optional) brand domain

Buy joffiels.com (GoDaddy ~\$15/yr) -> GitHub Pages (see docs/DOMAIN_SETUP.md). The site funnels to Etsy; Etsy stays the checkout.

Command cheat-sheet

Do this	python -m quoteforge.admin ...
Daily ops read	briefing
Pull new Etsy orders	poll-etsy
Sync tracking -> buyers	track-orders
Buyer approved -> print	customer-approved ID
Resolve an issue	autopilot "" ID
Cost & profit P&L;	ledger month
Friday review email	weekly-review email
Monthly exec packet	monthly-review email
Executive report	exec-report all
Workflow PDF	workflow-pdf
Ask Ange a question	ask "..."
Full backup + push	backup-all

The one true gate is Step 1. Everything else is ready.
